

Ubbink Ventilated Flexible Dry Ridge Kit

The Ubbink Flexible Dry Ridge Kit is a mortar free system to mechanically fix the ridge tiles according to BS5534. It is easy to install under most weather conditions. The Kit offers sufficient components for a ridge of a typical house up to 6M. It offers a long lasting, secure and maintenance free solution for your roof and it matches a wide range of ridge tiles.

The Dry Ridge Kit complies with BS 5250 and provides a high level of ventilation and a good resistance to wind uplift. Suitable for roof pitches up to 55°.

Contents of one Dry Ridge Kit

- 13 ridge unions
- 26 ridge clips
- 13 clamping plates
- 13 screws
- 1 ridge roll (6m x 300mm)
- 10 ridge batten straps
- Installation guide

A 50mm wide ridge batten and its fasteners are not included.

Application

- The resistance against wind uplift of the Dry Ridge Kit is suitable for the majority of pitched roofs in the United Kingdom.

Material

Ridge Roll

Metal: Two strips of corrugated aluminium 0.12—0.14 mm (EN AW-3005 or EN AW-1100)
Coating: Polyester/Acrylic or laminated polyester paint
Middle Lane: Diffusion technical fabric (PP/PE)
Connection: Sewing and gluing
Adhesive: 25mm butyl strips

Ridge Union

Polyethylene

Clamping Plate

Stainless steel (24 x 50mm)

Ridge Clips

Polyamide

Screws

Stainless steel

Ridge Batten Straps

Profiled strip made of galvanised steel sheet 20 x 325mm

Colours

- Black (RAL 9005)

Product Code

- Black 294350

Recommended tools

- Hammer, tape measure and battery powered screw driver
